GROWTH MARKETING

MEDIA NIRVANA

DIGITAL GROWTH PARTNERS

About

Media Nirvana is a results-driven **digital marketing agency** that helps brands grow smarter — blending data, creativity, and strategy to achieve measurable results.

With over **13 years of combined experience** in digital marketing, performance media, and brand building, we specialize in:

- Google & Meta Ads & AI Tools
- SEO & Content Marketing
- Social Media Strategy
- Web Design & Landing Page Optimization
- B2B,B2C Lead Generation & Conversion Funnels

Our Promise

We don’t bluff — we measure.

Every move is backed by **data, strategy, and intent**.

Every campaign we build is designed to **maximize ROI**, **lower acquisition costs**, and **drive long-term, sustainable growth** for our clients.

About the Founders

Sravan Kumar Kaparaboina – Founder & Performance Director

- A growth-focused digital marketer and strategist with 20+ years of combined experience leading **B2B, SaaS, and eCommerce marketing** across global markets.
- Sravan brings deep expertise in **AI Tools**,**Google Ads, SEO, and conversion tracking**, helping startups and mid-sized companies establish a scalable digital foundation.
- He has led **Media Nirvana** to become a trusted partner for businesses across **India, UAE, UK, and the U.S.**, known for its performance-first, automation-driven approach.
- He believes marketing should be **profitable, predictable, and personalized**.

About the Founders

Akash Thrunahari - Co-Founder & Growth Strategist

Dynamic and results-driven sales and marketing leader with a proven record of scaling interior, design, and lifestyle brands through innovation, strong client relationships, and data-driven marketing.

With over six years of experience in sales leadership and brand strategy, Akash has played a pivotal role in driving business growth, optimizing performance, and establishing high-conversion marketing systems across B2B and B2C domains.

He has successfully built business divisions from the ground up, achieving up to **75% reduction in cost per lead (CPL)** through strategic growth frameworks and digital transformation initiatives.

Recipient of the **Times Business Award 2023** for excellence in marketing and brand growth, Akash brings expertise in **digital strategy, client acquisition, and conversion funnel optimization**.

Passionate about integrating **sales intelligence with creative strategy**, Akash focuses on delivering measurable, scalable, and sustainable growth for emerging and established brands alike.

Our Vision

"To be the most trusted digital growth partner for ambitious brands blending creativity, data, and human insight to drive performance that lasts."

At Media Nirvana, our vision is to:

- **Empower brands with transparent, ROI-focused marketing.**
- **Build long-term partnerships that go beyond campaigns.**
- **Use technology and storytelling to connect brands with people in meaningful ways.**
- **Make digital growth accessible to every business — no matter its size or budget.**

Media Nirvana-Case studies

Duratek (Office chair manufacturer)

Challenges

- Low-quality leads from generic search terms like “office chairs” attracting retail customers instead of bulk buyers.
- Difficulty reaching **corporate procurement teams**, **interior designers**, and **office furniture resellers**.
- Limited online visibility compared to established B2B furniture brands.
- High **Cost per Lead (CPL)** and long sales cycle for enterprise clients.

Strategy

- **B2B-Focused Keyword Targeting:** Shifted to high-intent commercial terms like *"bulk office chair supplier"*, *"corporate furniture manufacturer"*, and *"wholesale office seating."*
- **Audience Layering:** Targeted business owners, HR/admin professionals, and facility managers on Google and LinkedIn Ads.
- **Ad Messaging Revamp:** Highlighted *bulk pricing, warranty, delivery timelines,* and *custom branding options* in ad creatives.
- **Landing Page Optimization:** Designed a dedicated **B2B inquiry page** emphasizing MOQ (Minimum Order Quantity), catalog downloads, and a clear CTA to "Request Bulk Quote."
- **Conversion Tracking Setup:** Integrated GA4 and Meta Pixel to accurately measure qualified form submissions and quote requests.
- **Remarketing:** Deployed remarketing on Google Display and Meta to re-engage decision-makers who visited product or catalog pages.

Results

- **30% reduction in CPL** through improved keyword and audience targeting.
- **62% increase in qualified B2B inquiries** within the first 60 days.
- **47% higher landing page conversion rate** from optimized messaging and form flow.
- **20% boost in quote-to-sale conversion** as sales team received more relevant leads.

HomeDealz (Real Estate)

Challenges

- High competition from property portals like 99acres and MagicBricks driving up ad costs.
- Low trust among buyers in the resale property segment due to outdated or duplicate listings.
- Unqualified leads from generic real estate keywords with poor conversion to site visits.
- Needed to improve **lead quality**, reduce **Cost per Lead (CPL)**, and position HomeDealz as a **trusted resale partner** for premium communities.

Strategy

- **Geo-Targeted Campaigns:** Focused Google Ads around key high-demand communities and neighborhoods (e.g., Gachibowli, Kokapet, Hitech City).
- **Branded Keyword Targeting:** Ran search ads using builder and community names like “My Home Vihanga resale” and “Aparna Sarovar second sale.”
- **Landing Page Customization:** Created location-specific pages with verified property listings, high-quality visuals, and strong CTAs (“Book a Visit” / “Get Verified Listings”).
- **Lead Qualification Filters:** Integrated CRM tagging to separate buyer and broker inquiries for faster follow-up.
- **Remarketing Campaigns:** Deployed Meta and Display retargeting for users who visited listings but didn’t inquire.
- **Trust Messaging:** Added badges like “Verified Resale Listing” and highlighted transparent commissions to build buyer confidence.

Results

- **41% reduction in CPL** within 60 days.
- **54% increase in qualified buyer leads** from verified listings.
- **32% improvement in landing page conversion rates.**
- **3x higher engagement rate** on remarketing campaigns targeting verified resale communities.

Personiks (Healthcare)

Challenges

- High competition from other cosmetic clinics and aggregators like Practo driving up **CPL**.
- Ad restrictions on Meta and Google for aesthetic surgery keywords, reducing visibility.
- Existing campaigns driving **low-quality or unqualified leads** (non-serious inquiries or information seekers).
- Needed to **increase appointment bookings** for premium procedures like **Liposuction, Mommy Makeover, Tummy Tuck, and Rhinoplasty** while maintaining ad compliance.

Strategy

- **Keyword and Compliance Optimization:** Ran Google Ads using approved medical terms and symptom-based targeting (e.g., “body contouring Hyderabad,” “post-pregnancy fat reduction”).
- **Localized Targeting:** Focused campaigns within a 30 km radius of Hyderabad with demographic filters (ages 25–45, higher income segments).
- **Landing Page Redesign:** Developed dedicated pages per procedure with before/after galleries, doctor credentials, FAQs, and clear CTAs like “Book Consultation.”
- **Conversion Tracking Setup:** Integrated GA4 and call-tracking to measure form fills, WhatsApp clicks, and direct calls.
- **Remarketing Campaigns:** Re-engaged website visitors with testimonial ads, educational videos, and limited-time consultation offers.
- **Trust-Building Content:** Highlighted top-rated Google Reviews, NABH accreditation, and real patient stories across ad creatives.

Results

- **37% reduction in Cost per Lead (CPL)** within 45 days.
- **52% increase in qualified consultation bookings** for high-value procedures.
- **61% improvement in landing page conversion rate** after redesign.
- **4.2x ROAS** achieved from combined Google and Meta Ads campaigns.

SB Interiors (Residential and Commercial Interior Designers)

Challenges

- Client was **not ranking organically** for local keywords like “interior designers in Hyderabad” or “office interior contractors.”
- High **Cost per Lead (CPL)** from paid campaigns due to intense competition from local interior design firms and aggregator platforms like Livspace and DesignCafe and Homelane.
- Weak online presence — inconsistent branding, slow website speed, and limited local citations affecting credibility.
- Needed to **generate qualified leads** from both **residential homeowners (B2C)** and **corporate fit-out projects (B2B)**.

Strategy

- **SEO Optimization:**
  - Conducted in-depth keyword research targeting city + intent keywords (e.g., “modular kitchen interiors Hyderabad,” “commercial interiors contractor”).
  - Created **service-specific landing pages** and optimized metadata, schema, and internal linking.
  - Implemented **Google Business Profile (GBP) optimization** with regular photo updates, FAQs, and location posts.
  - Built high-authority **local backlinks** from business listings and design directories.
- **Paid Campaigns:**
  - Launched **Google Search Ads** targeting residential and commercial interior terms with ad copies emphasizing trust, portfolio, and free consultation offers.
  - Set up **Meta Ads** for retargeting website visitors with before-after project visuals and client testimonials.
  - Optimized ad scheduling to run during peak inquiry hours (9 AM – 8 PM).

Results

- **42% reduction in CPL** from Google and Meta Ads combined.
- **Top 5 Google rankings** achieved for 10+ commercial and residential interior-related keywords within 3 months.
- **78% increase in organic traffic** and **65% more inbound leads** through SEO-driven content and GBP optimization.
- **2.9x ROAS** from paid campaigns targeting high-intent interior design keywords.

StockVenture(Fintech)

Challenges

- High competition from established players and YouTube educators in the **stock trading education** space.
- **Google and Meta ad restrictions** on financial content, making lead generation campaigns difficult to scale.
- Poor-quality leads from generic campaigns — many users seeking free tips instead of paid training programs.
- Needed to **increase enrollments** for paid stock market courses while maintaining ad policy compliance and improving lead quality.

Strategy

- **Refined Targeting:**
  - Focused on age group **22–40**, financially active audiences in metro cities (Hyderabad, Bangalore, Pune, Delhi).
  - Used interests and behaviors related to **finance, trading, and investment** on Meta Ads.
  - Implemented **custom audiences** based on website visitors, video viewers, and lookalike lists.
- **Ad Funnel Creation:**
  - Designed a **3-step funnel**: Awareness (educational video ads) → Consideration (free demo / webinar signup) → Conversion (course enrollment).
  - Developed strong ad creatives using *educational hooks* ("Learn proven trading setups — not signals").
- **Landing Page Optimization:**
  - Created separate landing pages for beginner and advanced programs with **clear course benefits, trainer credentials, testimonials**, and **limited-time offer CTAs** ("Join Free Demo Class").
  - Added **WhatsApp lead integration** for immediate consultation follow-ups.

Results

- **46% reduction in Cost per Qualified Lead (CQL)** within 60 days.
- **3.4x ROAS** across Meta and Google campaigns combined.
- **62% increase in course demo sign-ups** and **27% higher paid enrollments.**
- **Organic traffic up by 55%** within 3 months due to SEO + blog consistency.

UWorld (EdTech SaaS)

Challenges

- Increasing competition in the **test preparation SaaS market** from brands like Kaplan, Becker, and BoardVitals.
- High **Cost per Trial Sign-Up (CPS)** in international markets (U.S., Middle East, India).
- Needed to improve **subscription conversions** from free trial users while maintaining brand authority.
- Organic content was strong, but **SEO and paid acquisition channels weren't fully optimized for regional intent**.

Strategy

- **Performance Funnel Optimization:**
  a. Designed a **multi-stage funnel**: Awareness (YouTube & Meta video ads) → Consideration (Free Trial signup via Google Search & Display) → Conversion (Email + remarketing automation).
  b. Targeted students and professionals by **exam type** — USMLE, CFA, CPA, NCLEX — with ad segmentation by program and geography.
- **SEO & Content Revamp:**
  a. Optimized category and blog pages with high-volume exam-specific keywords (“best USMLE QBank 2025,” “CFA Level 1 mock tests”).
  b. Implemented **structured schema** for course and review snippets to improve CTR in SERPs.
  c. Built backlinks from credible educational forums and career platforms.
- **Ad Campaigns & Targeting:**
  a. Launched **Google Search + Performance Max campaigns** across the U.S., Canada, and India.
  b. Utilized **Dynamic Display ads** showcasing real student testimonials and success rates.

Results

- **38% reduction in Cost per Sign-Up (CPS)** across major exam categories.
- **57% increase in paid subscriptions** within 90 days.
- **2.8x ROAS** on combined Google + Meta ad spend.
- **23% higher retention rate** among new subscribers due to improved onboarding and remarketing flow.
- **Top 3 organic ranking** for multiple high-intent keywords like *“best USMLE QBank”* and *“CFA mock test platform.”*

Summary

Client	Industry	Primary Goal	Key Result
Duratek	B2B Manufacturing	Reduce CPL	-30% CPL, +62% leads
HomeDealz	Real Estate	Improve lead quality	-41% CPL, +54% buyer leads
Personiks	Healthcare	Increase consultations	-37% CPL, +52% bookings
SB Interiors	Interiors (B2B+B2C)	SEO + Paid synergy	+78% organic traffic, -42% CPL
StockVenture	Education (Finance)	Increase enrollments	+62% demo signups, 3.4x ROAS
UWorld	EdTech SaaS	Reduce CPS, boost subscriptions	-38% CPS, +57% subscriptions
